

## What in the world is a TreeDiaper™?

TreeDiaper is a revolutionary new way to care for plants and trees.

TreeDiaper™ is a patented self-maintaining plant hydration system that absorbs over 200 times its weight in water for slow release into the soil below.

TreeDiaper is the first and only product to combine the functions of slow release irrigation, automatic recharging with natural precipitation and weed control into one low-cost package.

The super slow release rate maintains soil moisture levels to stretch out your water supply. Moist soil absorbs and retains water better; water just runs through over-dry soil.

The large watering area provides enough moisture for trees and shrubs to survive dry spells, and more importantly, encourages root growth for healthier plants.

TreeDiaper is a trademark of Zynnovations LLC

## TreeDiapers are available in a wide range of sizes for different applications

Potted Plants

New Trees

Garden Beds

## The TreeDiaper Advantage

- No filling needed - automatically recharges with rain and irrigation water through the permeable top layer
- The super absorbent polymer (SAP) filling slowly releases water
- All season use, protects and hydrates even during winter months
- Durable woven polyethylene shell will last for several seasons
- Slow-release irrigation reduces water consumption and loss to evaporation
- Provides weed control and prevents soil erosion
- Great for maintaining plants during drought and dry summer months
- Ideal for remote locations that are difficult to water
- A perfect companion to rain barrels and rain harvesting systems – make the most of collected rain water
- An easy alternative to a drip irrigation system
- Proven results, in side-by-side field tests, plants with TreeDiaper grow faster and larger than without.
- A unique and thoughtful gift for anyone with a green thumb
- Made in USA

## TreeDiaper can be installed dry or wet depending on the season

### Dry Installations (during rainy season)

1. Lay the TreeDiaper or Garden Mat black side up over the soil around plants.
2. Cover with a layer of mulch (optional).
3. TreeDiaper will automatically absorb rain and irrigation water.

### Wet Installation (recommend for best results)

1. Soak TreeDiaper in a bucket or wheel barrow for several hours or overnight if possible.
2. Place the TreeDiaper with the black side up around plants and trees.
3. Cover with mulch if desired.
4. Every time it rains TreeDiaper will automatically recharge.

**ALWAYS INSTALL WITH THE BLACK SIDE FACING UP!**

## TreeDiaper™ for Potted plants

- Great for frequent travelers and busy professionals
- Eliminates water stains on the floor
- Reduce the frequency for routine watering

TreeDiapers keyhole design makes it easy to install around existing plants and can be concealed with mulch

Available sizes: (sold in twin packs)

- TD10" For 8-10" pots
- TD12" For 10-12" pots
- TD16" For 14-16" pots
- TD18" For 16-18" pots
- TD20" For 18-20" pots

## TreeDiaper™ for Trees

- Ideal for use in remote locations where watering is not convenient
- Better looking than watering bags
- Don't watch your investment in trees dry and wither due to summer drought and neglect!

Install TreeDiaper around new trees to establish healthy root growth and defend against over-dry conditions. Unlike watering bags, the low profile can be covered with mulch for an invisible installation.

Available sizes:

TD24" For trees up to 1.5" caliper  
 one piece design with keyhole opening

TD36" For trees up to 3" caliper  
 two part design

4TD48" For trees up to 5" caliper  
 four part design for easy handling

## TreeDiaper™ Garden Mats

- For garden beds, raised beds and container gardening
- Additional rows can be planted in between mats if desired
- It's easy to maintain a healthy weed free garden!

**GardenMat24-1 (sold in pairs)**

24"x 24" square with a single opening in the center. For beds 22". Two pair of GM24 -1's can be used for square beds between 40" - 52".

**GardenMat24-4 (sold in pairs)**

24"x 24" square. Each mat has 4 openings for plants spaced 12" apart. Two pair of GM24 - 4's can be used for square beds between 40" - 52".

**GardenMat40 for 36" to 44" beds**

Mat is 40"x 22" with 3 openings for plants spaced 12" apart. A single mat can be used for 18 - 24" wide beds. The unique weed block edge allows 2 rows of mats to adjust for 36" to 44" wide beds with a continuous weed barrier between rows.

**GardenMat48 for 4' or 8' long beds**

Mat is 48"x 22" with 4 openings for plants spaced 12" apart. The unique weed block edge allows 2 rows of mats to adjust for 36" to 44" wide beds with a continuous weed barrier between rows.

**GardenMat9 for 6' to 12' beds**

Mat is 72"x 18" with 6 openings for plants spaced 12" apart. 2 rows of mats can be placed side-to-side for 36" to 48" wide beds.
